

Instructor: Yann Lamontagne
Office: 7B.16
Office Hours: Office hours are posted outside the office 7B.16 and on the website.
Telephone: (514) 931-8731 #4137
E-mail: ylamontagne@dawsoncollege.qc.ca
Website: <http://www.obeymath.org>
 The solutions to the evaluations as well as announcements and additional examples are posted on the website. The material of previously taught courses is also available.

Teacher Accessibility: For out of class communication please see me during my office hours.
Term Work: *Term work is worth 25% or 50% of final grade, see Grading Policy.*

	<i>Tentative contents:</i>	<i>Percent of term work grade:</i>	<i>Tentative schedule:</i>
Test 1	General Vector Spaces	29%	Thursday March 10th, 2022
Test 2		29%	Thursday April 14th, 2022
Test 3		22%	Thursday May 12th, 2022
WeBWorKs		20%	due every Sunday at 22h00 unless announced otherwise

Important:

- When classes must be given online due to College directives:
 - lectures are given through Zoom through the LEA (Omnivox) platform;
 - office hours are given online through Zoom upon request (e-mail).
- There will be no make-up tests or WeBWorKs. If a valid medical note is presented the weight of the test or WeBWorK will be transferred proportionally to the remaining evaluations of the semester.
- WeBWorKs questions cannot be submitted late. Questions that are not answered by the due date receive a mark of zero.
- Students who will be absent for any predictable reason on a test day must inform the instructor in writing within the first two weeks of the semester of their intent to be absent so that alternative arrangements can be made. The written notice must be given even when the exact date is not known until later.
- Students who are interested in the completing the Comprehensive Evaluation(CE) are required to meet with the instructor within the first two weeks of the semester. In addition, an agreement on the Comprehensive Evaluation(CE) must be reached within the first month of the semester. Any student wishing to complete the Comprehensive Evaluation(CE) must meet the above two conditions.
- Please note that I do **not** use Omnivox MIO, and messages sent to MIO are unfortunately ignored.

Course Objectives

For details, see “Dawson Science Program”.

Course Competencies

This course will allow the student to fully achieve the competency:

00UQ: To apply the methods of linear algebra and vector geometry to problem solving.

1. To express concrete problems as linear equations.
2. To solve systems of linear equations using matrices.
3. To establish connections between geometry and algebra.
4. To determine equations of geometric loci (straight lines and planes) and find their intersections.
5. To calculate angles, lengths, areas and volumes.
6. To demonstrate propositions.
7. To make two- and three- dimensional drawings of loci.

Pre-requisites

High school or CEGEP Functions or equivalent.

Note, however, that the majority of the students who take this course have already passed Calculus I and Calculus II, so they exhibit a fair degree of mathematical maturity.

Ponderation

3-2-3 (3 hours of lecture, 2 hours of labs, and 3 hours of work outside class for each 5 hours of class time)

Evaluation

The Institutional Student Evaluation Policy (ISEP) is designed to promote equitable and effective evaluation of student learning and is therefore a crucial policy to read and understand. The policy describes the rights and obligations of students, faculty, departments, programs, and the College administration with regard to evaluation in all your courses, including grade reviews and resolution of academic grievance. ISEP is available on the Dawson website. <https://www.dawsoncollege.qc.ca/governance/institutional-student-evaluation-policy/>

Term Work

A minimum of 3.5 hours of in class testing is required.

Final Examination

The final examination will be a supervised, comprehensive examination held during the formal examination period.

Evaluation Policy

The grading scheme will be the best of:

- Option 1:
 - 50% term work
 - 50% final examination
- Option 2:
 - 25% term work
 - 75% final examination

In order to pass the course, students must obtain a final grade of at least 60%, calculated according to the evaluation scheme above.

Required Text and Materials

Required text: *Elementary Linear Algebra (Custom Edition)* by H. Anton and C. Rorres.

References: *Linear Algebra with Applications*, by W.K. Nicholson, *Linear Algebra - Ideas and Applications*, R.C. Penney.

Calculators: Students are only permitted to use the Sharp EL-531** calculator during tests and examinations.

Online Teaching - Web Cameras

At certain times and for certain purposes, teachers have the right to require students to turn on their web cameras. These occasions are the following:

- At the beginning of class.
- During oral presentations or when students are practicing language skills.
- When the competency requires a demonstration of movements, gestures or manipulations.
- During evaluations.

Teaching Methods

Lectures and problem sessions.

Attendance & Course Participation Requirements

Attendance is recommended for the successful completion of the course.

For additional information regarding attendance, students should refer to the Institutional Student Evaluation Policy (ISEP section IV-C).

Literacy Standards

Problem solving is an essential component of this course. Students will be expected to analyze problems stated in words, to present their solutions logically and coherently, and to display their answers in a form corresponding to the statement of the problem, including appropriate units of measurement. Marks will be deducted for work which is inadequate in these respects, even though the answers may be numerically correct.

Student Obligations

Everyone has the right to a safe and non-violent environment. Students are obliged to conduct themselves as stated in the Student Code of Conduct and in the ISEP section on the roles and responsibilities of students (ISEP section II-D).

1. Students have an obligation to arrive on time and remain in the classroom for the duration of scheduled classes and activities.

2. Students have an obligation to write tests and final examinations at the times scheduled by the teacher or the College. Students have an obligation to inform themselves of, and respect, College examination procedures.
3. Students have an obligation to show respectful behavior and appropriate classroom deportment. Should a student be disruptive and/or disrespectful, the teacher has the right to exclude the disruptive student from learning activities (classes) and may refer the case to the Director of Student Services under the Student Code of Conduct.
4. Electronic/communication devices (including cell phones, mp3 players, etc.) have the effect of disturbing the teacher and other students. All these devices must be turned off and put away. Students who do not observe these rules will be asked to leave the classroom.

Academic Integrity

Cheating in Examinations, Tests, and Quizzes: Cheating includes any dishonest or deceptive practice relative to formal final examinations, class tests, or quizzes. Such cheating is discoverable during or after the exercise in the evaluation process by the instructor. Such cheating includes, but is not limited to:

1. copying or attempting to copy another's work.
2. obtaining or attempting to obtain unauthorized assistance of any kind.
3. providing or attempting to provide unauthorized assistance of any kind.
4. using or possessing any unauthorized material or instruments which can be used as information storage and retrieval devices.
5. taking an examination, test, or quiz for someone else.
6. having someone take an examination, test, or quiz in one's place.

Unauthorized Communication: Unauthorized communication of any kind during an examination, test, or quiz is forbidden and subject to the same penalties as cheating.

Plagiarism on Assignments and the Comprehensive Examination: Plagiarism is the presentation or submission by a student of another person's assignments or Comprehensive Examination as his or her own. Students who permit their work to be copied are considered to be as guilty as the plagiarizer.

Penalties: Cheating and plagiarism are considered extremely serious academic offences. Action in response to an incident of cheating and plagiarism is within the authority of the teacher. Penalties may range from zero on a test, to failure in the course, to suspension or expulsion from the college.

According to ISEP, the teacher is required to report to the Sector Dean all cases of cheating and plagiarism affecting a student's grade. (See ISEP section V-C.)

Intensive Course Conflicts & Policy on Religious Observance

If a student is attending an intensive course, the student must inform the teacher, within the first two weeks of class, of the specific dates of any anticipated absences.

Students observing religious holidays must inform each of their teachers, in writing, of the specific dates as soon as possible, but no later than the end of the second week of the impacted semester or term. Alternative arrangements convenient to both the student and the teacher must be made at the earliest opportunity. In the event that the date of a religious observance has yet to be determined, students must submit the name of the observance to their teachers and provide them with the specific date(s) as soon as it becomes available. This applies both to the semester or term, as well as to any final examination period. Students who make such arrangements will not be required to attend classes or take examinations on the designated days, nor be penalized for their absence.

It must be emphasized, however, that this College policy should not be interpreted to mean that a student can receive credit for work not performed. It is the student's responsibility to fulfill the requirements of the alternative arrangement. (ISEP Section IV-D)

A form for this purpose is available here: https://www.dawsoncollege.qc.ca/mathematics/religious_observance_and_intensive_courses_form/

Mathematics Tutorial Room

Volunteer math teachers are available for help in room 7B.1 from 10:00 to 16:00 (Monday through Friday) and from 17:00-18:00 (Monday through Thursday).

COVID-19

For all Covid-related questions, please refer to Dawson College's FAQ page at <https://www.dawsoncollege.qc.ca/current-semester/return-to-campus-fall-2021/>

Course Content & Tentative Schedule

TOPICS	LEARNING ACTIVITIES	(sections & problems in text****)	Time (in weeks)
Systems of Linear Equations	Introduction to Systems of Linear Equations	1.1 #1-24, 26, T-F	5
	Gaussian Elimination	1.2 #1-43, T-F	
	Matrices and Matrix Operations	1.3 #1-13(odd), 15-20, 23-26, 29, 30, 32, 35, 36, T-F	
	Inverses; Algebraic Properties of Matrices	1.4 #5-10, 15-18, 19-27(odd), 31-50, T-F Problems for 201-NYC-05* #1.1-1.2	
	Elementary Matrices and a Method for Finding A^{-1}	1.5 #1-7(odd), 9-33, T-F	
	More on Linear Systems and Invertible Matrices	1.6 #1-9, 11, 13-23, T-F	
	Diagonal, Triangular and Symmetric Matrices	1.7 #1-23(odd), 25-27, 29-32, 34, 36-38, 41-47, T-F Supp. Ex. #5, 9-15, 17-21, 24	
Determinants	Determinants by Cofactor Expansion	2.1 #1, 3, 5-41, T-F	2
	Determinants by Row Reduction	2.2 #1, 3, 5-30, 33-34, T-F	
	Properties of Determinants; Cramer's Rule	2.3 #3, 5, 7-39, T-F Problems for 201-NYC-05* #2.1-2.4	
		Supp. Ex. 16, 27-29, 31, 32, 33	
Euclidean Vectors Spaces	Vectors in 2-Space, 3-Space, and n-Space	3.1 #1-15(odd), 16, 17-23(odd), 25, 27-29, T-F	4
	Norm, Dot Product, and Distance in R^n	3.2 #1-19(odd), 24, 26, 27, 29, T-F	
	Orthogonality	3.3 #1-5(odd), 7-33, 38, T-F	
	The Geometry of Linear Systems	3.4 #1-25(odd), 26, 27, T-F	
	Cross Product	3.5 #1, 3-25(odd), 26-30, 33-38, T-F Supp. Ex. #13-20, 23, 24	
	The following additional topics are covered**:		
	More on lines (skew lines, nearest points, distance, ...)	Problems for 201-NYC-05* #4.1-4.7	
More on planes (nearest points, distance, ...)	Problems for 201-NYC-05* #5.1-5.8		
General Vector Spaces	Real Vector Spaces	4.1 #1-12, 17-24, 28, T-F	4
	Subspaces	4.2 #1-15, 18, 22, T-F(skip d)	
	Linear Independence	4.3 #1-12, 15, 16, 22, 24-29, T-F	
	Coordinate and Basis	4.4 #1-10, 11-19(odd), 23, 29, 31, T-F	
	Dimension	4.5 #1-7(odd), 8, 10-12, 14, 15, 17, T-F	

* Handout: Problems for 201-NYC-05 Science available here: <https://www.dawsoncollege.qc.ca/mathematics/course-supplements/>

** Topic not covered in the text

*** Additional problems might be provided by the teacher
